

# 建筑范例分析

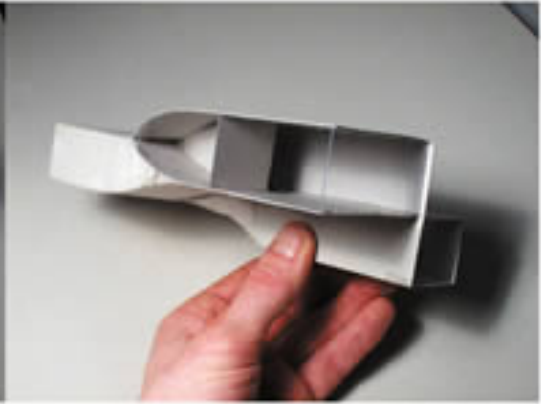

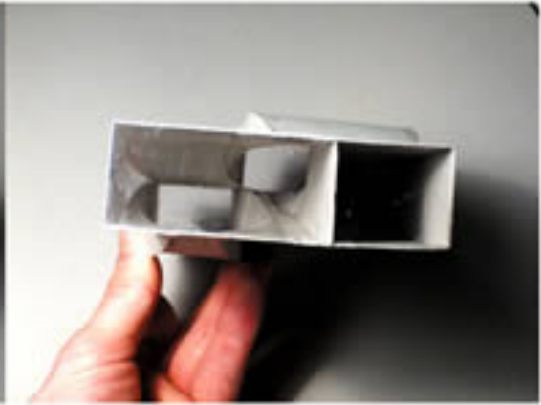

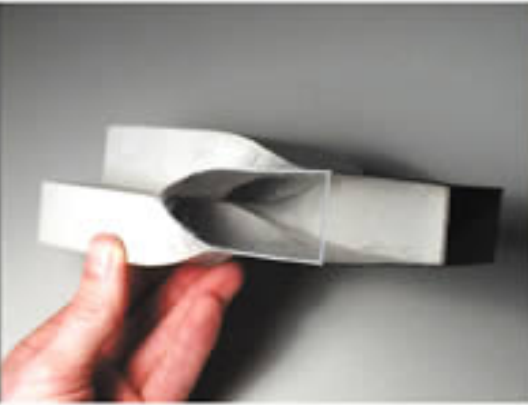

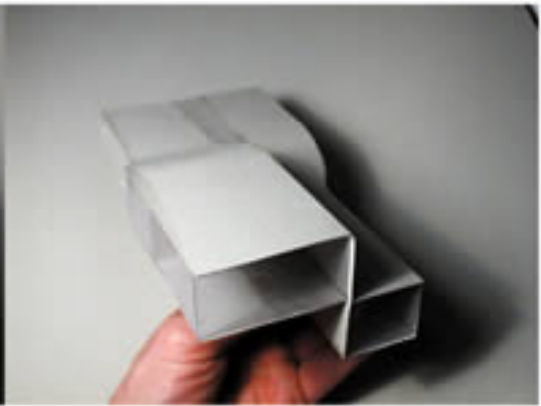

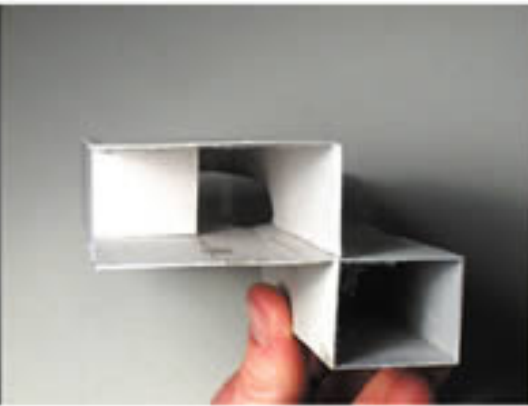

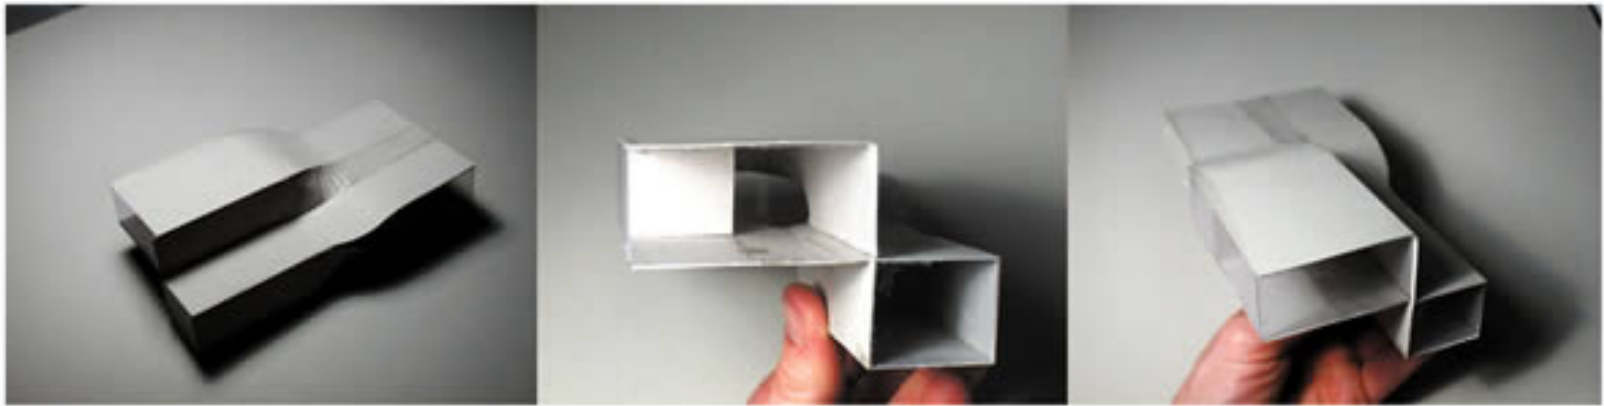

UN Studio

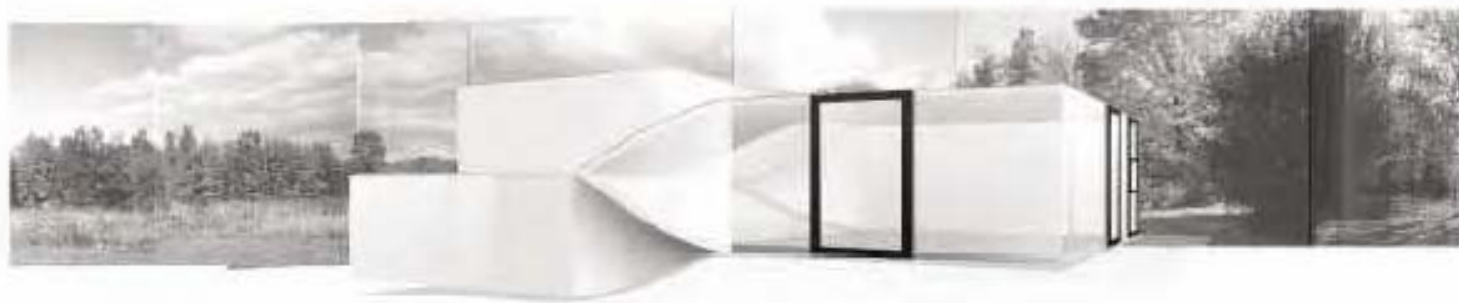

– Villa nm

- a simple shoe-box shape to bifurcate into two separate volumes , one clinging to the northern slope, the other detaching itself from the ground to leave room underneath for a covered parking space.

UNStudio principal Ben van Berkel

**The house morphs into a different form with each elevation, as revealed from its north (top), southeast (middle), and west (bottom) orientations.**

# 场地条件

Sited atop a hill in rural New York State, the house appears to rise over the terrain. A long drive leads to the building's east side and carport. UNStudio inserted a lap pool on the western slope.

- 地势——由北向南升高
- 环境——西南部 树林  
东北部 公路  
西部 水池

# 地势的限制和利用

- 分割功能区域
- 丰富空间形式

# 环境的利用

借树木及周围景致，充分丰富了建筑外立面

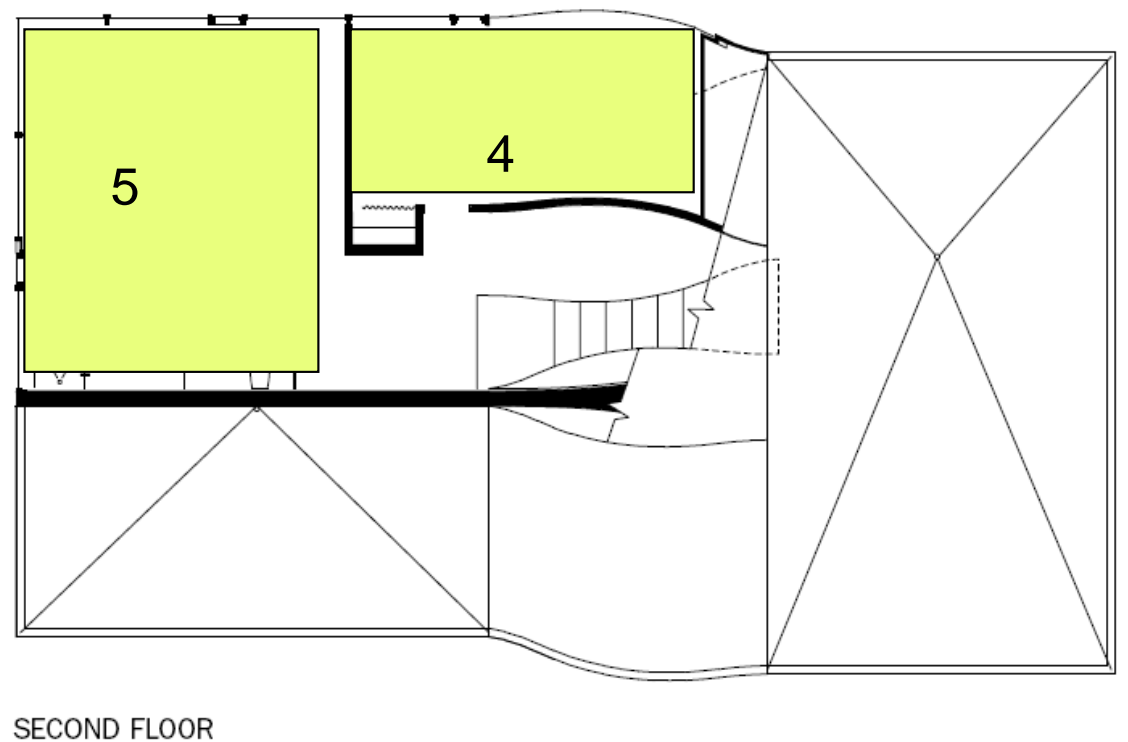

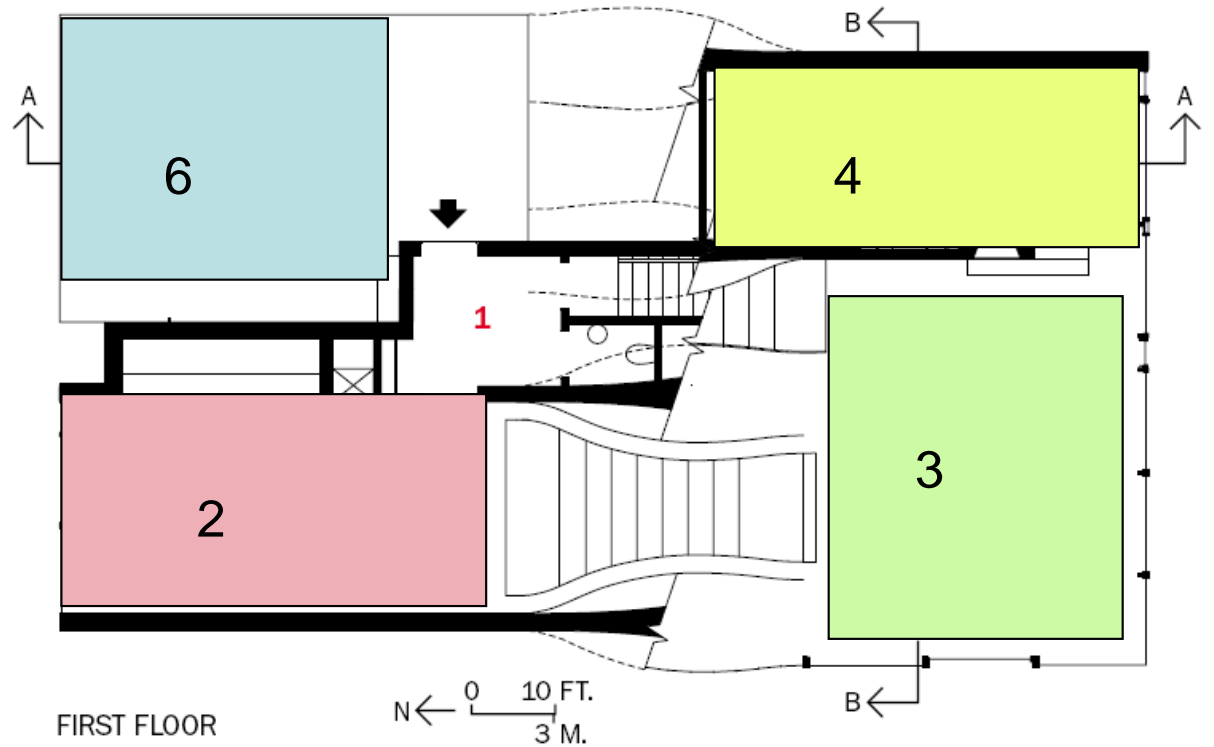

公共区域的围合  
使用玻璃墙，使  
空间更开阔，户  
外景致融入室内，  
空间更具延伸  
感。
